AUTHOR INDEX – 1978

Alarie, Y. C.
Thermal Stability and Toxicity of Polymers: Polyphosphazenes, p. 50

Alger, R. S.
Extinguishment of Class B Fires with Halon 1301, p. 99

Alvares, N. J.
Measurements of the Combustion Heat Release Rate of Laboratory Construction Materials with a Modified Flame Spread Apparatus, p. 337

Annamalai, K.
Ignition and Flame Spread Tests of Cellular Plastics, p. 445

Barlow, J. W.
A Ten Foot Tunnel for Measuring Flame Spread Rate, p. 407

Beason, D. G.
Measurements of the Combustion Heat Release Rate of Laboratory Construction Materials with a Modified Flame Spread Apparatus, p. 337

Benisek, L.
Burning Behavior and Smoke Emission of Wool-Rich Furnishing Fabric Blends, p. 308

Brandt, D. L.
Ignition Characteristics of Some Aircraft Interior Fabrics, p. 527

Char Yield and Flash-Fire Propensity of Pyrolysis Gases from Materials, p. 553

Brink, D. L.
A Flow Reactor Technique for the Study of Wood Pyrolysis I. Experimental, p. 176

Bryan, J. L.
An Analysis of the Variations in the Behavior in Fire Situations Between Selected British and United States Populations, p. 249

Bullen, M. L.
The Burning Rate of Wood Dowels in Small-Scale Arrays, p. 189

Cagliostro, D. E.
Modeling Aerosol Losses and Clothing Effects in Fires, p. 535

Callaerts, R.
Influence of Chlorinated Hydrocarbons on the Flash Point of Important Ketones, p. 229

Collette, J. W.
The Flammability Characteristics of Highly Mineral Polyethylene Composites, p. 430

Fewell, L. L.
Fire Resistivity and Toxicity Studies of Candidate Aircraft Passenger Seat Materials, p. 377

Fitzgerald, W. E.
Quantification of Fires: I. Energy Kinetics of Burning in a Dynamic Room Size Calorimeter, p. 510

Ford, H. W.
Measurements of the Combustion Heat Release Rate of Laboratory Construction Materials with a Modified Flame Spread Apparatus, p. 337

Glassman, I.
Some Perceptions on Condensed Phase Flame Spread and Mass Burning, p. 88

Glazar, B. L.
The Flammability Characteristics of Highly Mineral Filled Ultrahigh Molecular Weight Polyethylene Composites, p. 430

Howard, E. G.
The Flammability Characteristics of Highly Mineral Filled Ultrahigh Molecular Weight Polyethylene Composites, p. 430

Hallman, J. R.
Radiation Absorption for Polymers: The Radiant Panel and Carbon Arcs as Radiant Heat Sources, p. 353

Herrington, R. M.
The Release Rate of Heat, Smoke and Primary Toxicants from Burning Materials, p. 284

Hertzberg, M.
Pneumatic Fire Detection with Tube Bundles, p. 199

Hilado, C. J.
Development of a Horizontal Flash Fire Test: Preliminary Studies, p. 127

A Simple Laboratory Method for Determining Ignitability of Materials, p. 164

Fire Response Test Methods for Aerospace Materials, p. 217

Smoke Studies with the Arapahoe Chamber, p. 240

A Simple Laboratory Method for Determining Ignitability of Materials, p. 164

Fire Response Test Methods for Aerospace Materials, p. 217

Smoke Studies with the Arapahoe Chamber, p. 240

Char Yield and Toxicity of Pyrolysis Gases from Materials, p. 367

Smoke Density Studies with the Arapahoe and NBS Chambers, p. 459

Ignition Characteristics of Some Aircraft Interior Fabrics, p. 527

Char Yield and Flash-Fire Propensity of Pyrolysis Gases from Materials, p. 553

Holmes, C. A.
Room Corner-Wall Fire Tests of Some Structural Sandwich Panels and Composites, p. 467

Jin, T.
Visibility Through Fire Smoke, p. 135

Kurtz, A.
Studies of the Smoldering Combustion of Flexible Polyurethane Cushioning Materials, p. 5

Larsen, E. R.
A Small Scale Test for Evaluating the Surface Flame Propagating Properties of Polymers, p. 156

Litton, C. D.
Pneumatic Fire Detection with Tube Bundles, p. 199

Magill, J. H.
Thermal Stability and Toxicity of Polymers: Polyphosphazenes, p. 50

Machado, A. M.
Smoke Studies with the Arapahoe Chamber, p. 240

Char Yield and Toxicity of Pyrolysis Gases from Materials, p. 367

Smoke Density Studies with the Arapahoe and NBS Chambers, p. 459

Massoudi, M. S.
A Flow Reactor Technique for the Study of Wood Pyrolysis I. Experimental, p. 176

Matonis, V. A.
A New Small Scale Ignition Resistance Test, p. 14

Murphy, R. M.
A Simple Laboratory Method for Determining Ignitability of Materials, p. 164

Smoke Density Studies with the Arapahoe and NBS Chambers, p. 459

McCarter, R. J.
Smoldering Combustion of Wood Fibers: Cause and Prevention, p. 119

McNeil, R. R.
Burn-Out Tests of Wall Lining Materials, p. 275

Ohlemiller, T. J.
Studies of the Smoldering Combustion of Flexible Polyurethane Cushioning Materials, p. 5

A Survey of Several Factors Influencing Smoldering Combustion in Flexible and Rigid Polymer Foams, p. 489

Ou, S. S.
Smoke Development from Multiple Materials, p. 30

Phillips, W. A.
Burning Behavior and Smoke Emission of Wool-Rich Furnishing Fabric Blends, p. 308

Prager, F. H.
Study of the Burning Behaviour of Upholstered Furniture, p. 71

Rogers, F. E.
Studies of the Smoldering Combustion of Flexible Polyurethane Cushioning Materials, p. 5

A Survey of Several Factors Influencing Combustion in Flexible and Rigid Polymer Foams, p. 489

Schraufnagel, R. A.
A Ten Foot Tunnel for Measuring Flame Spread Rate, p. 407

Seader, J. D.
Smoke Development from Multiple Materials, p. 30

Sebata, K.
Thermal Stability and Toxicity of Polymers: Polyphosphazenes, p. 50

Sibulkin, M.
Ignition and Flame Spread Tests of Cellular Plastics, p. 445

Sliepcevich, C. M.
Radiation Absorption for Polymers: The Radiant Panel and Carbon Arcs as Radiant Heat Sources, p. 353

Spieth, H. H.
Fire Resistivity and Toxicity Studies of Candidate Aircraft Passenger Seat Materials, p. 377

Story, B. A.
The Release Rate of Heat, Smoke and Primary Toxicants from Burning Materials, p. 284

Summerfield, M.
Studies of the Smoldering Combustion of Flexible Polyurethane Cushioning Materials, p. 5

Trabold, E. L.
Fire Resistivity and Toxicity Studies of Candidate Aircraft Passenger Seat Materials, p. 377

Welker, J. R.
Radiation Absorption for Polymers: The Radiant Panel and Carbon Arcs as Radiant Heat Sources, p. 353

Wiersma, S. J.
Extinguishment of Class B Fires with Halon 1301, p. 99

Woollerton, G. R.
The Use of Release Rate Tests to Evaluate Flammability of Communications Cable, p. 317

SUBJECT INDEX – 1978

ABS
Development of a Horizontal Flash Fire Test: Preliminary Studies, p. 127

Activation Energy (Thermal)
Thermal Stability and Toxicity of Polymers: Polyphosphazenes, p. 50

Aerospace Materials
Fire Response Test Methods for Aerospace Materials, p. 217

Aircraft Interior Fabrics
Ignition Characteristics of Some Aircraft Interior Fabrics, p. 527

Aircraft Seats
Fire Resistivity and Toxicity Studies of Candidate Aircraft Passenger Seat Materials, p. 377

Aluminotrihydrate
The Flammability Characteristics of Highly Mineral Filled Ultrahigh Molecular Weight Polyethylene Composites, p. 430

Arapahoe Chamber
Smoke Studies with the Arapahoe Chamber, p. 240

Smoke Density Studies with the Arapahoe and NBS Chambers, p. 459

ASTM-E-84
A Small Scale Test for Evaluating the Surface Flame Propagating Properties of Polymers, p. 156

Blends Ketones – Chlorinated Hydrocarbons
Influence of Chlorinated Hydrocarbons on the Flash Point of Important Ketones, p. 229

Burning Behavior
Burning Behavior and Smoke Emission of Wool-Rich Furnishing Fabric Blends, p. 308

Calcium Carbonate
The Flammability Characteristics of Highly Mineral Filled Ultrahigh Molecular Weight Polyethylene Composites, p. 430

Calorimetry
Quantification of Fires: I. Energy Kinetics of Burning in a Dynamic Room Size Calorimeter, p. 510

Carbon Arcs
Radiation Absorption for Polymers: The Radiant Panel and Carbon Arcs as Radiant Heat Sources, p. 353

Carbon Monoxide Formation
The Flammability Characteristics of Highly Mineral Filled Ultrahigh Molecular Weight Polyethylene Composites, p. 430

Cellular Plastics
Ignition and Flame Spread Tests of Cellular Plastics, p. 445

Cellulose Materials
A Simple Laboratory Method for Determining Ignitability of Materials, p. 164

Cellulosic Materials
Smoke Density Studies with the Arapahoe and NBS Chambers, p. 459

Char Yield
Char Yield and Flash-Fire Propensity of Pyrolysis Gases from Materials, p. 553

Chlorinated Hydrocarbons
Influence of Chlorinated Hydrocarbons on the Flash Point of Important Ketones, p. 229

Class B Fires
Extinguishment of Class B Fires with Halon 1301, p. 99

Clay
The Flammability Characteristics of

Highly Mineral Filled Ultrahigh Molecular Weight Polyethylene Composites, p. 430

Combustion Products Analysis
The Release Rate of Heat, Smoke and Primary Toxicants from Burning Materials, p. 284

Curtain Fabrics
Ignition Characteristics of Some Aircraft Interior Fabrics, p. 527

Detection in Buildings
Pneumatic Fire Detection with Tube Bundles, p. 199

Escape
Visibility Through Fire Smoke, p. 135

Escape Time
Burn-Out Tests of Wall Lining Materials, p. 275

Extinguishment Tests
Extinguishment of Class B Fires with Halon 1301, p. 99

Fabrics
A Simple Laboratory Method for Determining Ignitability of Materials, p. 164

Fillers
The Flammability Characteristics of Highly Mineral Filled Ultrahigh Molecular Weight Polyethylene Composites, p. 430

Fire
Visibility Through Fire Smoke, p. 135

Fire Detection
Pneumatic Fire Detection with Tube Bundles, p. 199

Fire Extinguishing Systems
Extinguishment of Class B Fires with Halon 1301, p. 99

Fire Resistivity
Fire Resistivity and Toxicity Studies of Candidate Aircraft Passenger Seat Materials, p. 377

Fire Retardants
Studies of the Smoldering Combustion of Flexible Polyurethane Cushioning Materials, p. 5

Fire Safety
A New Small Scale Ignition Resistance Test, p. 14

Fire Tests
Burn-Out Tests of Wall Lining Materials, p. 275

Flame Retardant Plastics
A Small Scale Test for Evaluating the Surface Flame Propagating Properties of Polymers, p. 156

Flame Retardant Wool
Burning Behavior and Smoke Emission of Wool-Rich Furnishing Fabric Blends, p. 308

Flame Spread
Burn-Out Tests of Wall Lining Materials, p. 275

Ignition and Flame Spread Tests of Cellular Plastics, p. 445

Flame Spread Classification
A Small Scale Test for Evaluating the Surface Flame Propagating Properties of Polymers, p. 156

Flame Spread Test
A Small Scale Test for Evaluating the Surface Flame Propagating Properties of Polymers, p. 156

Flammability
Fire Resistivity and Toxicity Studies of Candidate Aircraft Passenger Seat Materials, p. 377

The Flammability Characteristics of Highly Mineral Filled Ultrahigh Molecular Weight Polyethylene Composites, p. 430

Ignition and Flame Spread Tests of Cellular Plastics, p. 445

Flammability Testing
Radiation Absorption for Polymers: The Radiant Panel and Carbon Arcs as Radiant Heat Sources, p. 353

Flash-Fire Propensity
Development of a Horizontal Flash Fire Test: Preliminary Studies, p. 127

Fire Response Test Methods for Aerospace Materials, p. 217

Char Yield and Flash-Fire Propensity of Pyrolysis Gases from Materials, p. 553

Flash Point
Influence of Chlorinated Hydrocarbons on the Flash Point of Important Ketones, p. 229

Flow Reactor Technique
A Flow Reactor Technique for the Study of Wood Pyrolysis I: Experimental, p. 176

Furniture Assemblies
Quantification of Fires: I. Energy Kinet-

ics of Burning in a Dynamic Room Size Calorimeter, p. 510

Gas Release
The Release Rate of Heat, Smoke and Primary Toxicants from Burning Materials, p. 284

Gypsum Boards
Burn-Out Tests of Wall Lining Materials, p. 275

Halon 1301
Extinguishment of Class B Fires with Halon 1301, p. 99

Hardwood Plywood
Burn-Out Tests of Wall Lining Materials, p. 275

HCN Analysis
The Release Rate of Heat, Smoke and Primary Toxicants from Burning Materials, p. 284

Heat Release
Fire Response Test Methods for Aerospace Materials, p. 217

The Release Rate of Heat, Smoke and Primary Toxicants from Burning Materials, p. 284

Quantification of Fires: I. Energy Kinetics of Burning in a Dynamic Room Size Calorimeter, p. 510

High Rise Fire Detection
Pneumatic Fire Detection with Tube Bundles, p. 199

Ignitability
A Simple Laboratory Method for Determining Ignitability of Materials, p. 164

Fire Response Test Methods for Aerospace Materials, p. 217

Ignition Characteristics of Some Aircraft Interior Fabrics, p. 527

Ignition
Ignition and Flame Spread Tests of Cellular Plastics, p. 445

Ignition Resistance
A New Small Scale Ignition Resistance Test, p. 14

Ignition Sources
Quantification of Fires: I. Energy Kinetics of Burning in a Dynamic Room Size Calorimeter, p. 510

Ketones
Influence of Chlorinated Hydrocarbons on the Flash Point of Important Ketones, p. 229

Kinetics of Pyrolysis
A Flow Reactor Technique for the Study of Wood Pyrolysis I: Experimental, p. 176

Laboratory Test
A Small Scale Test for Evaluating the Surface Flame Propagating Properties of Polymers, p. 156

Light-Scattering
Visibility Through Fire Smoke, p. 135

Mass Loss
The Burning Rate of Wood Dowels in Small-Scale Arrays, p. 189

Mobile Homes
Burn-Out Tests of Wall Lining Materials, p. 275

Modacrylic
Burning Behavior and Smoke Emission of Wool-Rich Furnishing Fabric Blends, p. 308

NBS Chamber
Smoke Density Studies with the Arapahoe and NBS Chambers, p. 459

NBS Smoke Test
The Flammability Characteristics of Highly Mineral Filled Ultrahigh Molecular Weight Polyethylene Composites, p. 430

Non-Metallic
Fire Resistivity and Toxicity of Candidate Aircraft Passenger Seat Materials, p. 377

Ohio State Release Rate Apparatus
The Release Rate of Heat, Smoke and Primary Toxicants from Burning Materials, p. 284

Oxygen Index Test
A Small Scale Test for Evaluating the Surface Flame Propagating Properties of Polymers, p. 156

The Flammability Characteristics of Highly Mineral Filled Ultrahigh Molecular Weight Polyethylene Composites, p. 430

Plastics
Smoke Studies with the Arapahoe Chamber, p. 240

Polyethylene
Development of a Horizontal Flash Fire Test: Preliminary Studies, p. 127

Polymer Surface Absorptance
Radiation Absorption for Polymers: The Radiant Panel and Carbon Arcs as Radiant Heat Sources, p. 353

Polymers
A New Small Scale Ignition Resistance Test, p. 14

Radiation Absorption for Polymers: The Radiant Panel and Carbon Arcs as Radiant Heat Sources, p. 353

Polyphosphazenes
Thermal Stability and Toxicity of Polymers: Polyphosphazenes, p. 50

Polystyrene
Development of a Horizontal Flash Fire Test: Preliminary Studies, p. 127

Polyurethanes
Studies of the Smoldering Combustion of Flexible Polyurethane Cushioning Materials, p. 5

Char Yield and Flash-Fire Propensity of Pyrolysis Gases from Materials, p. 553

Products of Combustion
Pneumatic Fire Detection with Tube Bundles, p. 199

PVC
Burning Behavior and Smoke Emission of Wool-Rich Furnishing Fabric Blends, p. 308

Pyrolysis
Char Yield and Flash-Fire Propensity of Pyrolysis Gases from Materials, p. 553

Radiant Panel
Radiation Absorption for Polymers: The Radiant Panel and Carbon Arcs as Radiant Heat Sources, p. 353

The Flammability Characteristics of Highly Mineral Filled Ultrahigh Molecular Weight Polyethylene Composites, p. 430

Radiation Absorption
Radiation Absorption for Polymers: The Radiant Panel and Carbon Arcs as Radiant Heat Sources, p. 353

Radiative Transfer
The Burning Rate of Wood Dowels in Small-Scale Arrays, p. 189

Room Burns
Burn-Out Tests of Wall Lining Materials, p. 275

Screening
Fire Resistivity and Toxicity Studies of Candidate Aircraft Passenger Seat Materials, p. 377

Seat Upholstery Fabrics
Ignition Characteristics of Some Aircraft Interior Fabrics, p. 527

Sensory Irritation Index
Thermal Stability and Toxicity of Polymers: Polyphosphazenes, p. 50

Sign
Visibility Through Fire Smoke, p. 135

Smoke
Visibility Through Fire Smoke, p. 135

Fire Response Test Methods for Aerospace Materials, p. 217

Smoke Studies with the Arapahoe Chamber, p. 240

Smoke Detectors
Burn-Out Tests of Wall Lining Materials, p. 275

Smoke Emission
Burning Behavior and Smoke Emission of Wool-Rich Fabric Blends, p. 308

Smoke Evolution
Smoke Density Studies with the Arapahoe and NBS Chambers, p. 459

Smoke Particulates
Smoke Studies with the Arapahoe Chamber, p. 240

Smoke Transmission in Tubes
Pneumatic Fire Detection with Tube Bundles, p. 199

Smolder Susceptibility
Ignition Characteristics of Some Aircraft Interior Fabrics, p. 527

Smoldering
Studies of the Smoldering Combustion of Flexible Polyurethane Cushioning Materials, p. 5

Synthetic Polymers
Smoke Studies with the Arapahoe Chamber, p. 240

Test Methods
Development of a Horizontal Flash Fire Test: Preliminary Studies, p. 127

A Simple Laboratory Method for Determining Ignitability of Materials, p. 164

Fire Response Test Methods for Aerospace Materials, p. 217

Testing
A New Small Scale Ignition Resistance Test, p. 14

Thermal Stability in N_2 and O_2
Thermal Stability and Toxicity of Polymers: Polyphosphazenes, p. 50

Thermogravimetric Analysis
Thermal Stability and Toxicity of Polymers: Polyphosphazenes, p. 50

Toxic Gases
The Release Rate of Heat, Smoke and Primary Toxicants from Burning Materials, p. 284

Toxicity
Thermal Stability and Toxicity of Polymers: Polyphosphazenes, p. 50

Fire Response Test Methods for Aerospace Materials, p. 217

Fire Resistivity and Toxicity Studies of Candidate Aircraft Passenger Seat Materials, p. 377

Travel Times in Tubes
Pneumatic Fire Detection with Tube Bundles, p. 199

Tube Bundles
Pneumatic Fire Detection with Tube Bundles, p. 199

Ultrahigh Molecular Weight Polyethylene
The Flammability Characteristics of Highly Mineral Filled Ultrahigh Molecular Weight Polyethylene Composites, p. 430

Unsaturated Polyester Resins
A Small Scale Test for Evaluating the Surface Flame Propagating Properties of Polymers, p. 156

Upholstery
Studies of the Smoldering Combustion of Flexible Polyurethane Cushioning Materials, p. 5

Upward Burning
Ignition and Flame Spread Tests of Cellular Plastics, p. 445

Visibility
Visibility Through Fire Smoke, p. 135

Wood
A Simple Laboratory Method for Determining Ignitability of Materials, p. 164

The Burning Rate of Wood Dowels in Small-Scale Arrays, p. 189

Smoke Density Studies with the Arapahoe and NBS Chambers, p. 459

Wood Pyrolysis
A Flow Reactor Technique for the Study of Wood Pyrolysis I: Experimental, p. 176

Wool-Rich Blends
Burning Behavior and Smoke Emission of Wool-Rich Furnishing Fabric Blends, p. 308
